 Tacchini

Dressed

Designer: Luca Nichetto
Year: 2010

A two- or three-seat sofa with a distinctive sportswear-inspired look: the padding is sewn directly into the covers, as if it were the protection of a technical garment. A fresh, contemporary solution for a sofa with clean, rigorous lines, equally suitable for the home or for offices and waiting rooms.

Materials informations

Poplar plywood	45%
Polyurethane	28%
Upholstery	17%
Elastic belts	6%
Metal components	4%

Polyurethane

Flexible expanded polyurethane is a solid elastic polymeric material with open cell structure. It is a non-toxic material and above all free from ozone-damaging components. Production and processing of the polyurethane we use meet the objectives of the new policy of ensuring the protection of human health and of the environment. We focus in particular on the choice and use of the types of density of polyurethane suitable for preserving over the years the features of load capacity, elasticity and resilience. For products used in public spaces flame-retardant expanded polyurethane is chosen, tested and certified according to international regulations.

Elastic belts

The elastic belt used on the seats of our upholstered products is a component to be chosen with care in order to ensure adequate elasticity and springing for the dimension and the structure of the product. We use plaited elastic webbing to add greater comfort and resistance to weight stresses.

Metal

The need to combine complex yet lightweight shapes with resistant materials necessarily involves the use of metals such as steel and aluminium. Products in polyurethane foam are made with an inner steel frame for adding strength to the structure. The bases are in tubular metal which can be chromed with a gloss or satin finish or painted with epoxy powders.

Wood

Wood is a renewable raw material. All products derived from wood, such as for example plywood, have the advantage of being able to be machined more easily than wood and do not deform. The timber we use – solid or plywood – comes mainly from European and Russian forests and is seasoned to specific values of humidity with tests. Most of the structures of the products in the collection have a frame in solid pine or ash, or in beech or poplar plywood.

Recyclability

All Dressed elements are 100% recyclable when fully separated. Tacchini undertakes on-going research and development, with efforts made to introduce products which are a perfect combination of function and safety without jeopardizing the final design of the same articles. During production attempts are made to minimize noise and emission levels and to reduce rejects as far as possible. All the single materials which make up the production process, once disassembled, can be reused several times, maintaining a high quality standard.

Packaging

Dressed element is dispatched already assembled. It is protected by tissue paper and cellophane to protect the covering from dust and direct contact with the cardboard. The product is packed in rigid cardboard boxes suitable for world export. Manufacture of the packaging observes the criteria for recovery both as recycling and energy recovery and composting.

Once a product reaches the end of its life cycle it has to be eliminated.

Luca Nichetto

Luca Nichetto was born in Venice in 1976, and graduated in Industrial Design at IUAV university of architecture in Venice. In 1999 he launched his professional career, designing his first products in Murano glass. Later the same year he began working with Foscarini, designing a number of products for the firm and working as a consultant for research into new materials and product development (2001-2003). In 2006 he set up his own agency, Nichetto&Partners, dealing in both industrial design and design consultancy. He has received a number of international prizes, including the Gran Design Award 2008, the Chicago Atheneum Museum of Architecture Good Design Award 2008, the IF Product Design Award 2008 and the Elle Decoration International Design Awards 2009 (EDIDA) as Designer of the Year in the Young Designer Talent category. He has held workshops in numerous universities both in Italy and abroad, and has exhibited in Europe, the United States and Japan.
